Several members of our local RACES group are working on a project to provide improved local communications in times of emergency.

Known as the "repeater in an ice chest" project, we are assembling a small, low powered 440 MHz repeater for portable deployment in an emergency.

We are currently looking for 440 MHz duplexers, preferably the six-cavity flat type previously used for IMTS mobile phone type applications. I think that these were manufactured by Phelps-Dodge.

Any assistance would be appreciated. Thanks!

I have several Motorola HT220s (and a GE and a Maxon) that I
need to get crystals for. Can anyone suggest a place that sells
crystals for a reasonable price? I also need a line on low cost
batteries for the same radios.

Thanks in advance.

I'm looking for information on the Stoddard Electronics line of field intensity meters (NM-##). They also produced militarized units with mil-nomenclature (usually PRM- or ME-).

In particular, each model's frequency range, accessory antennas required, etc., would be greatly appreciated.

Even better would be a copy of an old company catalog.

Please reply directly,
Scott

All,

I am selling my PK232 MBX Multilmode Controler from AEA for $75.00 plus shipping. It is in good condition, but missing some of the screws to the top cover do to replacing the lithium battery. It works great. I used it only for SWL reception a few years ago. I thought I may need it and hung on to it for all these years, but as you can see I no longer need it based on this post.

Thanks,

Gary G. Herbst

8. For Sale: RS DX-390 Shortwave Receiver

Newsgroup: rec.radio.amateur.swap
Date: 1995-06-13 00:00:00 UTC
From: future@eskimo.com
Message-ID: <DA4xKM.Dpz@eskimo.com>
Source record: 11299
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.equipment,rec.radio.swap,rec.radio.amateur.swap,seattle.forsale,misc.forsale,misc.forsale.non-computer,uw.forsale,uwash.forsale

For Sale: Realistic DX-390 Portable Shortwave Receiver. This radio covers 1.711 to 29.999 mHz shortwave in 1 or 5 kHz steps, 88-108 FM, 530-1710 AM, and 150-519 longwave. It includes BFO, direct access keypad, digital readout, clock/time display, external antenna jack, and alarm functions. Originally cost about $279.95 at Radio Shack and is in good working condition. Just $100 shipped via UPS to anywhere in the continental U.S. Contact future@eskimo.com if interested, or call (206) 277-5287. If you live in the Seattle area and can pick up, I will knock $15 off the price.

Note: My apologies to anyone who saw this ad originally at a much lower price. I cannot afford to sell that low.

9. Need info on Analogic 6000 scope

Newsgroup: rec.radio.amateur.swap
Date: 1995-06-17 00:00:00 UTC
From: stan@netcom.com
Message-ID: <stanDACC9x.EoB@netcom.com>
Source record: 11300
Cross-posted to: sci.electronics,rec.radio.amateur.swap

I am looking into the purchase of a surplus Analogic/Data Precision
Model 6000 oscilloscope with a model 650 vertical plug-in unit. I
have a few questions about this unit:

1) Is this unit basically a 4-channel scope with some data analysis
capability built-in?
2) What is the bandwidth of this scope/plug-in combo?
3) Is it useful, or should I look into a more conventional HP/Tek/Fluke
unit?
4) Is it reliable, and are accessories/manuals available?

Thanks in advance for your help.

14. WTD: Service Manual for UHF Motorola Mitrek

Newsgroup: rec.radio.amateur.swap
Date: 1995-07-28 00:00:00 UTC
From: paidukas@Harris.com
Message-ID: <3vak6m$820@hearye.mlb.semi.harris.com>
Source record: 11305
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

I am looking for a service manual for a high pwr UHF Motorola Mitrek. The unit is presently on 463.300 MHz, if this helps.

Yes I already know I can get anything for this radio from Motorola, so please don't send me their 800 number--I have it. A used book from someone out here would be sufficient.

Also can someone direct me to where I can find the mods for full duplex operation for the Mitrek? Nothing seems to be on the Oakland FTP site or a few other sites.

Any help finding these two items is greatly appreciated.

Hello, my name is Mike and I am in search of a Motorola
Saber 3 radio. As much as I would love to have a "secure" Saber
my HAM lic can live with only a "clear" version. 440-470 stock
pkg is fine.
Sounds easy enough, save for this one small caviot, it
must, must, have it's Serial Number tag visible and in good
condition on the back of the radio. Here in Brooklyn North the
police often "detain you for varification of ownership" of
your radio if the SN# tag is not in place. I have a wonderfull
Saber 3 that I bought at a HAM fest but it lacks the desired SN#.
So if for some reason money sounds better to you then
owning a Saber 3 clear uhf 5 watt radio then e-mail me fast

This is the BIG one. Great for serious VHFers
or for a repeater/packet node. BRAND NEW, sealed.
$275 U.S.

5) Diamond X-50 VHF/UHF Fibreglass Colinear.
This is the wee one. Great for serious VHFers
with smaller aspirations. BRAND NEW, sealed.
$120 U.S.

6) Carol RG-8X Coaxial Cable, 95% braid. Full reels only
of 1000 feet. $190 U.S. per reel (8 available)

7) Telex HyGain T2X Tailtwister Rotor. Too small for my
antenna array. Up for one season only. Being factory
reconditioned to new condition by Telex HyGain.
$425 U.S.

All units are FOB Toronto, Ontario but might be persuaded to
ship from Buffalo, N.Y. on one of my regular trips for Ted's
Hot Dogs.

28. WANTED: Hamfest Goodie - Roland TB-303 Bassline

Newsgroup: rec.radio.amateur.swap
Date: 1995-12-04 00:00:00 UTC
From: kobain@io.org
Message-ID: <49uaop$k9l@ionews.io.org>
Source record: 11319
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

Okay, before you flame me I know this isn't rec.music.makers.marketplace but a place for radio swapping.

However the item I am looking for is a Roland TB-303 Bassline (it looks like a little drum machine). Several people I know have managed to obtain them from Hamfests, so I figure I would ask if anybody has seen one or happens to have one.

It can be in any condition, working or not.

Since i have been looking for quite some time, if anyone can help me out I would certainly appreciate it.

Thanks.

Adam.

29. FS: Ranger 2950, Wilson 1000, Palomar 200w

Newsgroup: rec.radio.amateur.swap

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

For Sale:

Ranger RCI 2950, peaked & tuned by reputable radio technician at local ham radio store.. on low power, this unit deadkeys 2w and swings to 16w at full modulation. high power deadkeys at 9w and swings to 25w. Sideband PEP is 35w.

Wilson 1000 is the white magmount model.

Palomar 200 deadkeys 150w and swings to 220w on high power.. (3 power settings, with preamp)

People tell me that this setup sounds crystal clear and viciously LOUD, even with the stock microphone. I bought everything about 2 months ago, played with it for about a month, and it's been sitting in my closet since. I finally have a HAM liscense now and I have no need or desire to own CB equipment.. I've got my eyes on a nice VHF/UHF all-mode radio and I must liquidate this stuff in order to afford it.

$425 takes everything... I do not want to part it out. this price is FIRM.

Have you ever bought anything from Oklahoma Comm Center (1-800-765-HAMS)??

I'm looking at buying a radio mail order from them. They are $30 cheaper
than most other stores with free shipping and I'm not sure of thier
reliability.

e-mail to gregkopp@en.com or n8jms@cars.org

They are WAY up on the north side of OKC (maybe even Edmond) and I'm way down
on the south side. But I've bought several things from them, no problem.
They have a small display area, but are basically geared to mail order.
They've been in business for a few years now. They try to stay competitive
even when Hams want the wholesale price. I've seen em sell a radio for
five bucks over wholesale. I guess there's money in volume...

I've dealt with OCC on 3 occaisions, beginning about Sept. 1994. I have no
complaints with them. I can't speak about return policies or anything, since
I've had no need to return, but I'd encourage you to buy from there.

I LIVE in OKC, and I buy from them regularly. For the most part
they're nice guys, and they seem to work hard to take care of their
customers. I've made the same discovery, i.e., they're cheaper than
most of the other mail order places. Give them a try, I don't think
you'll be disappointed. Tell them KC5KBC/John gave them a thumb's up!

Add me to the list of satisfied customers - I called to order a used radio last tuesday, and it was in my hands on Friday (in Denver). The shipment included MORE accessories than they originally claimed, they didn't charge for shipment, everything was in excellent shape and well packaged. Definately pleased at this end.

Hi Greg,

I live a few miles from Oklahoma Comm Center and drop by often for a chat with Mike and Tony. They are the two guys you will most often deal with when calling on the phone. They are both knowledgeable active hams and are glad to share their experiences to help you pick out the rig that is right for you. I have never seen a better price on equipment or support for the buyer. I will admit that they are more geared for mail order than counter sales and if you walk into the showroom, you might wait awhile before they get around to helping you. If you are looking for reassurance, you have it. They are on the up and up and serious about selling you ham gear now and in the future.

P.S. - If you talk to Mike, tell him Glenn said he is a bottomfeeder. If you talk to Tony, have him pass the message to mike. o<:-)%

I meed some parts for busted radios.

Display for Yaesu FRG9600. It's a big vacuum fluorescent on the front panel board. Consider the whole board to reduce chance of damage to display.

Recieve Crystal for Kenwood TH-21AT. It's X2 on the schematic. Unfortunately, Kenwood sought not to put the frequency on the schematic. The frequency of oscillation is not what's marked on the xtal, and neither are the frequency it needs to be to make the radio work. I bought it used, so don't know if it's the stock xtal. Receive freq is about 10KHz off. If someone has a service manual, I'd appreciate knowing the correct frequency and part number for the crystal.

Has anyone found a way to repair the "lip" that holds the bottom of the battery on. Every TH-XXAT I've ever seen has a cracked lip. I'm considering making a small brass part that either stuffs down between the metal radio enclosure and the plastic outer case or solders to the top shield. Any ideas?

As I recall, the replacement case comes with a touchtone pad. So there ought to be a bunch of old touchtone pads out there in junk boxes. I'd like to try to modify one to make an encoder for a Standard C508A. Anybody willing to part with one?

thanks,
miker
